SICAM's progress gathers pace

22 December 2008

The applications for the next edition of SICAM are continuously arriving. In the last few days confirmations have arrived from leading producers of panels, decor papers and semi-finished products, including Trombini Group, Sueddekor and Fantoni Group. These confirmations go to join what is nothing less than a flood of components' and accessories' suppliers which, right from the first hours of the fair's office opening for registrations, have chosen to exhibit with SICAM in Pordenone. The latest additions show that the exhibition will be strongly representative of all segments of components, semi-finished products and accessories for furniture industry. This reaffirms the role of Pordenone – strong of its geographic position, directly in the middle of one of the biggest furniture production areas of Italy – as the capital city of furniture's wide-ranging universe.
